Introduction

The purpose of this Public Involvement Plan is to outline and help guide the process by which Minnesota Department of Transportation (MnDOT), Ontario Ministry of Transportation (MTO) and others (collectively called the project team) will communicate information and how the project team will solicit and consider input from the public during the Preliminary Design phase for the Baudette/Rainy River International Bridge Replacement.

The public and agency involvement program for this project has been developed in compliance with legislation and policies that guide public involvement in project development. In the US, this includes:

- National Environmental Policy Act of 1969 (NEPA), which requires US Federal agencies to conduct the environmental review process in coordination with the public and with other agencies;
- Safe, Accountable, Flexible, Efficient Transportation Equity Act: A Legacy for Users (SAFETEA-LU) of 2005, which broadened public and agency involvement guidance set forth in the Intermodal Surface Transportation Efficiency Act of 1991 (ISTEA) and the Transportation Equity Act for the 21st Century (TEA-21);
- Section 106 of the National Historic Preservation Act (NHPA) of 1966, 16 USC §470(A); and
- Executive Order 12898 of 1994 (“Federal Actions to Address Environmental Justice in Minority Populations and Low-Income Populations”).

SAFETEA-LU; Public Law 109-059, codified as Section 139 of amended Chapter 1 of Title 23, United States Code (23 U.S.C. 139), requires the development of a plan for coordinating public participation and comments early in the environmental review process. Accordingly, this public involvement plan:

- Identifies opportunities for public involvement
- Describes the methods that will be used for communication
- Describes the specific public meetings that will be held in the project area, the information that is likely to be presented at each meeting, and anticipated dates or timeframes and locations of the meetings
- Identifies the project schedule (as it currently stands)
- Identifies other meetings that will occur during the planning phase of the project that are open to the public

In Ontario, the Ontario Environmental Assessment Act (EAA) mandates that consultation with the public, government agencies and ministries, municipalities and other interested persons is mandatory and establishes a ‘Class Environmental Assessment’ process to streamline the planning for certain types of projects. The Act requires public inspection of environmental assessment and public notice of submission of environmental assessment and sets out requirements for mandatory notification during the EA process.

The Ministry of Transportation’s (MTO) Class Environmental Assessment (EA) for Provincial Transportation Facilities (2000) was approved under the EAA and outlines the consultation program requirements for a ‘Group B’ undertaking.

The Freedom of Information and Protection of Privacy Act (1990) also provides legislative guidelines for access of information to the public and the purposes of the Act are:

- a. To provide a right of access to information under the control of government organizations in accordance with the following principles:
 - » information should be available to the public;
 - » exemptions to the right of access should be limited and specific;
 - » decisions on the disclosure of government information may be reviewed by the Information and Privacy Commissioner.
- b. To protect personal information held by government organizations and to provide individuals with a right of access to their own personal information.

This public involvement plan may be updated periodically to reflect schedule updates and other changes.

For more information about this project and the Public Involvement Plan, please contact:

Project Description

The MnDOT, in cooperation with MTO, is working to replace the US 72 international border bridge. The bridge is located over the Rainy River on Minnesota Trunk Highway 72 and Ontario Provincial Highway 11. The route provides access to and from Baudette, Minnesota and Rainy River, Ontario. The bridge provides a connection between the United States and Canada full-service 24 hour Port of Entry facilities.

The bridge is classified as fracture critical and has a sufficiency rating of 48.8 out of 100. The structural members are actively corroding. The bridge currently can support normal weight loads but is not permitted to carry overweight loads or over-dimensional loads.

The project is currently in the preliminary design phase of the project, including environmental studies on both sides of the border. MnDOT and MTO are actively engaging agency stakeholders to establish their interest/involvement in the project. Anticipated stakeholders include US Federal, State, County and City agencies and Canadian Federal, Provincial and Municipal agencies. The bridge project is currently scheduled for construction in 2017.

To help further understand the planning phase for the Baudette/Rainy River International Bridge Replacement project, this public involvement plan includes the following appendices:

- ✦ **Appendix A:** A list of acronyms commonly used by the MNDOT and MTO during the project development process
- ✦ **Appendix B:** An overall schedule for the preliminary planning phase for the Baudette/Rainy River International Bridge Replacement project
- ✦ **Appendix C:** A matrix identifying public and other meetings, many of which are open to the public

Additional appendices are noted in subsequent sections. Glossaries of terms used by the MnDOT and MTO can be found at the following web addresses:

- ✦ MnDOT Glossary of Terms: <http://www.dot.state.mn.us/information/glossary.html>
- ✦ MTO Environmental Glossary: <http://www.raqsb.mto.gov.on.ca/techpubs/eps.nsf/8cec129ccb70929b852572950068f16b/87db83aff41c21c4852572b300578df3?OpenDocument>

Agency and Other Stakeholders

The Baudette/Rainy River International Bridge Replacement project has a large and diverse group of agency and other stakeholders.

Agency and Other Stakeholders

Federal – US	
Federal Highway Administration (FHWA)	US Customs and Border Protection (CBP)
General Services Administration (GSA)	Border Patrol
Drug Enforcement Agency (DEA)	Department of Homeland Security
US Coast Guard	Immigration and Custom Enforcement (ICE)
US Army Corps of Engineers (USACE)	Department of Agriculture Animal & Plant Health Inspection Services (APHIS)
Department of the Interior National Park Service – Office of Environmental Policy and Compliance	Department of Labor
US Department of Commerce – National Marine Fisheries	Environmental Protection Agency (EPA)
Food and Drug Administration (FDA)	Federal Aviation Administration (FAA)
US Fish and Wildlife Service (USFWS)	Federal Emergency Management Agency (FEMA)
US Department of State (DOS)	Department of Defense (DOD)
Department of Transportation – Office of International Transportation and Trade	Department of Transportation – Federal Motor Carrier Safety Administration
Federal Railroad Administration (FRA)	Department of Commerce (DOC) – Office of North American Free Trade Agreement (NAFTA) and Inter-American Affairs
Federal – Canada	
Canada Border Services Agency (CBSA)	Canadian Transportation Agency (CTA)
Transport Canada (TC)	Citizenship and Immigration Canada (CIC)
Canada Coast Guard	Canada Food Inspection Agency (CFIA)
Royal Canadian Mounted Police (RCMP)	Canadian Environmental Assessment Agency (CEAA)
Foreign Affairs, Trade & Development Canada (DFAIT)	Environment Canada
Canada Department of Fisheries & Oceans (DFO)	Health Canada
Human Resources and Skills Development	Canadian Heritage

Agency and Other Stakeholders (continued)

State of Minnesota	
Department of Transportation (MnDOT)	Minnesota Environmental Quality Board (MEQB)
Minnesota Department of Natural Resources (MDNR)	Minnesota Pollution Control Agency (MPCA)
Minnesota State Historic Preservation Office (SHPO)	Minnesota Department of Health
Minnesota Historical Society	
Province of Ontario	
Ministry of Transportation – Ontario (MTO)	Ontario Ministry of Northern Development and Mines
Ontario Ministry of Citizens and Immigration	Ontario Ministry of Natural Resources
Ontario Provincial Police, Northwest Region Headquarters - Rainy River Detachment	Ontario Ministry of the Environment and Climate Change
Ontario Ministry of Tourism, Culture and Sports	
Local – US	
City of Baudette	Lake of the Woods School District
Lake of the Woods County Board	Lake of the Woods County
Lake of the Woods Homeland Security	Lake of the Woods Land and Water Planning (SWCD)
Local – Canada	
Town of Rainy River	Rainy River Emergency Medical Services
Tribes – US	
Red Lake Nation	
First Nations and Aboriginal Groups - Canada	
Métis Consultation Unit Métis Nation of Ontario	Aboriginal Affairs and Northern Development Canada (AANDC)
Ministry of Aboriginal Affairs	Big Grassy River First Nations
Rainy River First Nations	Ojibways of Onigaming First Nation
Naicatchewenin First Nation	Couchiching First Nation
Mitaanjigamiing First Nation	Anishnaabeg of Naongashiing
Northwest Angle No.33	Northwest Angle No.37
Anishinabe of Wauzhushk Onigum	Nigigoonsiminikaaning First Nation
Pwi-Di-Goo-Zing Ne-Yaa-Zhing Advisory Services	Grand Council Treaty #3

Agency and Other Stakeholders (continued)

Other Interested Parties	
Canadian National Railway (CN)	Baudette Chamber of Commerce
Rainy River Chamber of Commerce	International Boundary Commission (IBC) - US
International Boundary Commission - (IBC)	International Joint Commission (IJC), United States (Great Lakes Region)
International Joint Commission (IJC), Canada	Transportation Border Working Group (TBWG) - United States
Transportation Border Working Group (TBWG) - Canada	Rainy-Lake of the Woods Watershed Board

It is acknowledged that many of the agency stakeholders with direct or indirect jurisdiction by law have a public interest finding to make as part of its agencies' action. To assist agencies with jurisdiction with their public interest findings: 1) the agency and other stakeholders will be invited to public involvement events; and, 2) the results of the public involvement program will be shared with the agency and other stakeholders' identified in this plan.

A complete list of the agency and other stakeholders for the Baudette/Rainy River International Bridge Replacement project and their contact information is contained in **Appendix D**.

Public Involvement Program

The public involvement program for the Baudette/Rainy River International Bridge Replacement project consists of the following:

- ✦ Project Advisory Committee (PAC)
- ✦ Project Website
- ✦ Mindmixer © – an online collaboration tool to provide input
- ✦ Public Meetings

Project Advisory Committee (PAC)

Project Advisory Committees (PACs) serve as a forum for public debate and discussion on transportation needs and solutions. The purpose of a PAC is to provide a comprehensive and orderly means of involving local interests in a transportation project. The role of the PAC is to advise MnDOT and MTO on community sentiment about a project. To do so equitably, the PAC must be democratic and representative of opposing points of view, with equal status for each participant in presenting and deliberating the views of their interests. By providing for representation of many different interests, a PAC can help to resolve conflicts between those interests.

To be most effective, a PAC must include people who represent the varied and often divergent interest in a community. Membership should fairly represent the concerns of planners, local government officials, environmentalists, businesses and business organizations, neighborhoods and neighborhood groups, the region surrounding the area, and many other diverse interests. Membership in a PAC does not require participants to have sophisticated training or specialized knowledge of transportation studies.

The objectives of the PAC are:

1. to advise MnDOT and MTO on issues
2. to help convey the concerns of local organizations, governments, and businesses to the study team
3. to help relay information presented by the study team back to citizens and community groups
4. to help identify transportation deficiencies and needs
5. to help strengthen public understanding of the study process and its regulatory framework
6. to discuss progress, work efforts, and activities
7. to help build consensus toward a preferred course of action
8. to help ensure that information is understandable to the public seeing it for the first time
9. to help provide continuing visibility and credibility for the public involvement program

The PAC consists of the following agencies and individuals:

Name	Representing	Phone Number	Email Address
Leion (Lee) Witte	General Services Administration (GSA)	218-720-5404	leion.witte@gsa.gov
Deborah Ewald	Town of Rainy River		
Roger Shotl	City of Baudette	320-282-9882	rogers@ci.baudette.mn.us
Shelly Kraft	US Customs and Border Services Agency (CBP)	218-634-2803	shelly.kraft@cbp.dhs.gov
Betty Shoemaker	Canada Border Services Agency (CBSA)	807-852-3085	Betty.Shoemaker@cbsa.gc.ca
Kim Beaudry	Canada Border Services Agency (CBSA)	807-274-5552	Kim.Beaudry@cbsa-asfc.gc.ca
Tim Erickson	Lake of the Woods County	218-634-1767	tim_e@co.lake-of-the-woods.mn.us
James "Buck" Nordlof	Lake of the Woods County	218-434-0399	buck_n@co.lake-of-the-woods.mn.us
Tom Hanson	Lake of the Woods County	218-434-1100	tom_h@co.lake-of-the-woods.mn.us
Dan McCormick	Rainy River Emergency Medical Services	807-274-5349 ext. 238	dmccorm@rrdssab.on.ca
Mike Hovde	Baudette Chamber of Commerce	218-634-2700	mikeh@wikel.com
Richard Trenchard	Rainy River Chamber of Commerce		rrdcoc@gmail.com

MnDOT and MTO anticipate that the PAC will meet four times during the study. The purpose of each of these meetings and the PAC's input and how it will inform or influence decision-making by MTO and MnDOT.

Meeting	The PAC assists the project team by...	The PAC input is used by the project team to...
Meeting #1 – Initial Issues Identification and Concerns	Identifying project issues and concerns Providing input by reviewing and supplementing the project team's inventory and impact assessment of sensitive resources, unique features, and local community and economic patterns Reviewing avoidance and minimization measures and suggesting others	Identify and determine the extent of the most important issues to be analyzed Identify and suggest eliminating issues which are not significant, narrowing the analysis and discussion of these issues Identify and fully develop the potential positive and negative impacts of the alternatives Further avoiding and minimizing impacts to the extent possible
Meeting #2 – Prior to Circulating the EA	Encouraging others to review the EA, help others understand the information, and develop and submit comments to the project team	Confirm the content of the EA, make factual corrections and supplement the analysis, if needed, and remain focused on the significant issues to be considered in decision-making
Meeting #3 – After Circulation of the EA but before the Public Hearing	Reviewing substantive comments received on the EA for their importance and make sure the comments are well understood	Facilitate preparation of the final EA: identification of the preferred alternatives, embody mitigation measures
Meeting #4 – After the Public Hearing	Communicating the results of the project to others	Promote understanding of the decision-making process
Throughout the Process	<i>Promoting awareness of the study and participation in public events</i>	<i>Obtain more thorough awareness for the project, its requirements, and its results</i>

A four-page handout describing the PAC (including its purpose, objectives, members and responsibilities, meeting frequency, and ground rules) is in **Appendix E**. The handout will be distributed to the PAC members at the first meeting and briefly reviewed at subsequent meetings.

Project Website

A website will be hosted by MnDOT to provide information on the Baudette/Rainy River International Bridge Replacement project. The website will be updated regularly over the course of the project.

MindMixer ©

MindMixer© (mindmixer.com) is an online public engagement platform. MindMixer© functions like a web-based town hall that extends the conversation of traditional in-person meetings online, and at a time and place convenient for interested community members. This is significant because despite best efforts by government agencies and consultants, fewer than 1 in 10 Americans make it to a traditional community engagement session per year. However, this is not because Americans are disconnected. In fact, nearly 90% of adults use the internet; and even among harder to reach groups like seniors, 53% of senior adults are online. With MindMixer©, we can meet people where they expect to be met.

After creating an account, participants engage in conversation through an interface designed specifically for conversation. Participants can give input, generate ideas, help others evolve their ideas, and prioritize the best ideas for a project or community from anywhere (and in the language of their choice). This engagement technology generates more stakeholder input in less time, reaches the right audience, and makes it possible to measure and analyze participating stakeholders and their ideas. It functions not only as a forum for collaboration, but also as a resource for informational materials about a project.

Sources: Pew Internet Research, 2014; Corporation for National and Community Service, 2012.

Public Meetings

Two Public Meetings will be held in Baudette and three will be held in Rainy River during the planning phase for the Baudette/Rainy River International Bridge Replacement project. The Public Meetings will be held concurrently or on consecutive days to ensure the same information is shared with local stakeholders at the same time and the events will be long enough to allow local stakeholders the opportunity to attend events on both sides of the border.

A Public Hearing will be held in Baudette to coincide with the third Public Meeting held in Rainy River.

Notices advertising the Public Meetings will be prepared and published in local newspapers. The notices advertising the US Public Meetings will invite comments from the public and other stakeholders on cultural resources and historic properties in accordance with the process for complying with the National Historic Preservation Act Section 106 (36 CFR 800.2(d)(3)).

Translators and sign language interpreters will not be provided for the Public Meetings unless requested.

It is anticipated other free or low-cost methods to advertise the Public Meetings (e.g., radio announcements, public service announcements, posters in public buildings and stores) will be used.

To help inform the other stakeholders that are not proximate to the project area, copies of the materials developed for the Public Meetings will be uploaded to the project website following the meeting.

Public Meeting #1

Public Meeting #1 will be held on June 24, 2015. The purposes of Public Meeting #1 are:

- ✦ Introduce the project and outline the process being used during the planning phase of the project
- ✦ Provide background information on the need for the project
- ✦ Seek input on the existing conditions in the project area
- ✦ Answer questions about the study and identify next steps

Public Meeting #2

It is anticipated that Public Meeting #2 will be held in the fall of 2015. The purposes of Public Meeting #2 are:

- ✦ Share the results of the alternatives developed and the screening process used to preliminarily identify a preferred alternative and plan for the project
- ✦ Seek input on the preferred alternative and plan for the project
- ✦ Answer questions about the study and identify next steps

Public Hearing and Public Meeting #3

It is anticipated that the Public Hearing and Public Meeting #3 will be held in early 2016.

The purpose of the Public Hearing is to provide an opportunity for the public to provide formal comments on the Environmental Assessment/Environmental Assessment Worksheet prepared in accordance with the National Environmental Policy Act and the Minnesota Environmental Policy Act. The public hearing will begin with a brief statement and a stenographer will be provided to record public comments.

The purposes of Public Meeting #3 are:

- ✦ Share the results of the Transportation Environmental Study Report
- ✦ Answer questions about the study and identify next steps

Meeting Matrix

Introduction to the Meeting Matrix

Notes:

This meeting matrix is a general chronology of events involving agencies external to MnDOT and MTO; dates, locations and attendees will be periodically updated.

Types of Meetings

TAC Meeting:	Keep TAC members and partners updated on the progress of the project.
PAC Meeting:	To share information with local stakeholders, identify issues of local concern, and provide an evaluation of project components.
Public Meeting:	Inform the public of progress of the project, gather information to shape the direction of the project and answer questions.
International Coordination:	To continue the planning and design with a focus on international issues and looking for opportunities to improve coordination and efficiencies.

Groups of Attendees

Transportation Agencies:	MnDOT; MTO; TC; FHWA
Port of Entry Agencies:	CBSA; GSA; CBP
Border Security Agencies:	CBSA; CBP; Department of Homeland Security; Immigration and Custom Enforcement (ICE); Border Patrol; Drug Enforcement Agency (DEA); Department of Agriculture Animal & Plant Health Inspection Service (APHIS); Royal Canadian Mounted Police (RCMP)
PAC:	MnDOT; MTO; Lake of the Woods County; the city of Baudette; Town of Rainy River; CBP, CBSA, Rainy River Emergency Medical Services, Baudette Chamber of Commerce, Rainy River Chamber of Commerce
TAC:	MnDOT; MTO; CBSA; CBP; GSA
Tribes	Red Lakes Nation
First Nations and Aboriginal Groups:	Aboriginal Affairs and Northern Development Canada (AANDC); Ministry of Aboriginal Affairs; Big Grassy River First Nations; Rainy River First Nations; Ojibways of Onigaming First Nation; Naiatchewenin First Nation; Couchiching First Nation; Mitaanjigamiing First Nation; Anishnaabeg of Naongashiing; Northwest Angle No. 33; Northwest Angle No. 37; Anishanabe of Wauzhushk Onigum; Nigigoonsiminikaaning First Nation; Pwi-Di-Goo-Zing-Ne-Yaa-Zhing Advisory Services; Grand Council Treaty #3; Métis Consultation Unit Métis Nation of Ontario
International Agencies:	International Boundary Commission (IBC); International Joint Commission (IJC)
Federal – US Agencies:	Coast Guard; US Army Corps of Engineers (USACE); Department of Labor; Food and Drug Administration; US Fish and Wildlife Services (USFWS); Federal Emergency Management Agency (FEMA); Department of the Interior National Park Service Office of Environmental Policy and Compliance; US Department of Commerce National Marine Fisheries; Environmental Protection Agency (EPA); Federal Aviation Administration (FAA); US Department of State; Department of Defense (DOD); President’s Council on Environmental Quality; Department of Justice (DOJ), Environmental and Natural Resources Division (ENR); Department of Transportation, Office of International Transportation and Trade; Department of Transportation, Federal Motor Carrier Safety Administration; Federal Railroad Administration (FRA); Department of Commerce (DOC), Office of North American Free Trade Agreement (NAFTA) and Inter-American Affairs
Federal - Canada Agencies:	Canadian Transportation Agency (CTA); Citizenship and Immigration Canada (CIC); Canada Coast Guard; Foreign Affairs, Trade & Development Canada (DFAIT); Canada Department of Fisheries & Oceans (DFO); Human Resources and Skills Development; Canada Food Inspection Agency (CFIA); External Affairs Canada; Canada Revenue Agency; Canadian Environmental Assessment Agency (CEAA); Environment Canada; Health Canada; Canadian Heritage
State Agencies:	Minnesota Environmental Quality Board (MEQB); Minnesota Department of Natural Resources (MDNR); Minnesota State Historic Preservation Office (SHPO), Minnesota Historical Society; Minnesota Pollution Control Agency (MPCA); Minnesota Department of Health
Provincial Agencies:	Ontario Ministry of Citizens and Immigration; Ontario Ministry of Natural Resources and Forestry; Ontario Ministry of the Environment and Climate Change; Ontario Ministry of Northern Development, Mines and Forestry; Ontario Provincial Police, Northwest Region Headquarters – Rainy River Detachment; Ontario Ministry of Culture and Sports
Local – US:	City of Baudette; Lake of the Woods School District; Lake of the Woods County Board; Lake of the Woods County; Lake of the Woods Homeland Security; Lake of the Woods Land and Water Planning (SWCD)
Local – Canada:	Town of Rainy River; Rainy River Emergency Medical Services
Other Interested Parties:	Canadian National Railway (CN); Baudette Chamber of Commerce; Rainy River Chamber of Commerce; Transportation Border Working Group (TWBG) – US; Transportation Border Working Group (TWBG) – Canada; Lake of the Woods Land and Water Planning; Trucking/transportation groups; Trans Canada Rails; Federation of Anglers and Hunters

Appendix E

PAC Handout

Project Advisory Committee High-Level Summary

The following is a high-level summary of the Project Advisory Committee assembled in support of MnDOT's and MTO's Baudette/Rainy River International Bridge Replacement Project.

Purpose

Project Advisory Committees (PACs) serve as a forum for public debate and discussion on transportation needs and solutions. The purpose of a PAC is to provide a comprehensive and orderly means of involving local interests in a transportation project. The role of the PAC is to advise MnDOT and MTO on community sentiment about a project. To do so equitably, the PAC must be democratic and representative of opposing points of view, with equal status for each participant in presenting and deliberating the views of their interests. By providing for representation of many different interests, a PAC can help to resolve conflicts between those interests.

Representing all Viewpoints

To be most effective, a PAC must include people who represent the varied and often divergent interest in a community. Membership should fairly represent the concerns of planners, local government officials, environmentalists, businesses and business organizations, neighborhoods and neighborhood groups, the region surrounding the area, and many other diverse interests. Membership in a PAC does not require participants to have sophisticated training or specialized knowledge of transportation studies. All PAC meetings are open to the public.

Objectives

1. to advise MnDOT and MTO on issues
2. to help convey the concerns of local organizations, governments, and businesses to the study team
3. to help relay information presented by the study team back to citizens and community groups
4. to help identify transportation deficiencies and needs
5. to help strengthen public understanding of the study process and its regulatory framework
6. to discuss progress, work efforts, and activities
7. to help build consensus toward a preferred course of action
8. to help ensure that information is understandable to the public seeing it for the first time
9. to help provide continuing visibility and credibility for the public involvement program

Richard Trenchard	Rainy River Chamber of Commerce		rrdcoc@gmail.com

PAC Responsibilities

- **Duty of Knowledge:** PAC members should stay informed, ask questions, understand the difference between facts and misconceptions and think strategically. They should communicate issues and concerns from members of the public and exercise reasonable care in explaining transportation issues before them.
- **Duty of Fairness:** PAC members should be open to new ideas and should make deliberate and knowledge-based recommendations. PAC Members should be good stewards when representing the committee, make independent judgments and not be influenced by special interests.
- **Duty of Commitment:** PAC members should spend their valuable and limited time together learning, listening and deliberating on transportation issues within their scope. PAC members should stay focused and not spend time on non-issues or beyond the scope of the study. To actively participate in committee discussions and make recommendations, members should be present at each meeting.

Meeting Schedule and Value to the Study

While the PAC does not make decisions about the project, the input of the PAC is important.

MnDOT and MTO anticipate that the PAC will meet approximately four times during the study. The following table summarizes the purpose of each of these meetings and the PAC's input and how it will inform or influence decision-making by MTO and MnDOT.

Meeting	The PAC assists the project team by...	The PAC input is used by the project team to...
Meeting #1 – Initial Issues Identification and Concerns	Identifying project issues and concerns Providing input by reviewing and supplementing the project team's inventory and impact assessment of sensitive resources, unique features, and local community and economic patterns Reviewing avoidance and minimization measures and suggesting others	Identify and determine the extent of the most important issues to be analyzed Identify and suggest eliminating issues which are not significant, narrowing the analysis and discussion of these issues Identify and fully develop the potential positive and negative impacts of the alternatives Further avoiding and minimizing impacts to the extent possible
Meeting #2 – Prior to Circulating the EA	Encouraging others to review the EA, help others understand the information, and develop and submit comments to the project team	Confirm the content of the EA, make factual corrections and supplement the analysis, if needed, and remain focused on the significant issues to be considered in decision-making
Meeting #3 – After Circulation of the EA but before the Public Hearing	Reviewing substantive comments received on the EA for their importance and make sure the comments are well understood	Facilitate preparation of the final EA: identification of the preferred alternatives, embody mitigation measures
Meeting #4 – After the Public Hearing	Communicating the results of the project to others	Promote understanding of the decision-making process
Throughout the Process	<i>Promoting awareness of the study and participation in public events</i>	<i>Obtain more thorough awareness for the project, its requirements, and its results</i>

Ground Rules

- ✦ Attend meetings regularly
- ✦ Meetings will begin and end on time
- ✦ Act as a liaison between the community and the project team
 - » Bring input to the project team
 - » Share project progress and PAC input with the community
- ✦ Provide comments, ask for clarification, request further information, and offer suggestions that are:
 - » Representative of others
 - » Representative of professional experience
- ✦ Refrain from expressing personal opinions or agenda
- ✦ Provide one another and the project team with pertinent information.
- ✦ Give each member an equal opportunity to express his or her point of view and opinions
- ✦ Respect the personal integrity, values and goals of their fellow members
- ✦ Expect disagreements and differences of opinion
- ✦ Share a mutual responsibility for assuring that the above operating procedures and ground rules are observed and maintained
