

AASHTO Technology Implementation Group Environmental Planning GIS Tools for Transportation Planning

Background

The American Association of State Highway and Transportation Officials' (AASHTO) Technology Implementation Group (TIG) Program identifies and champions the nationwide use of new, high-payoff, ready-to-use, innovative technologies that will benefit transportation agencies and improve the nation's transportation system. The AASHTO TIG Program selected the transportation departments of Maryland and Texas to showcase, through national outreach and education strategies, innovative methods that facilitate and improve environmental quality considerations in transportation project development.

Scope

Gannett Fleming was chosen to participate and lead the development of educational materials in support of the AASHTO TIG initiative, based upon our experience in evaluating and planning environmentally sustainable transportation projects in Maryland.

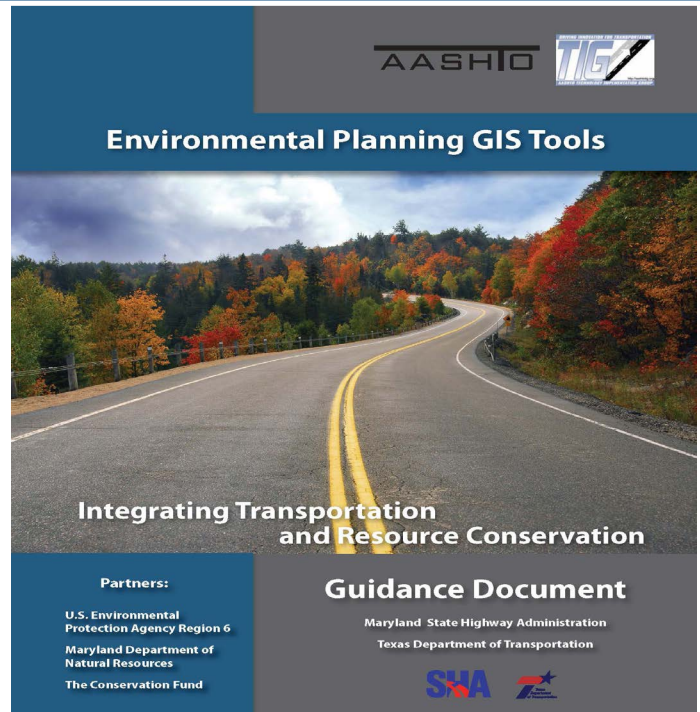

The goal of the educational materials is to market value-added environmental planning geographical information systems (GIS) tools to other transportation departments and to assist with the use and application of the tools into the transportation department's environmental analysis and decision-making process.

Accomplishments

Our firm worked in collaboration with the Maryland Department of Transportation State Highway Administration and the Texas Department of Transportation to develop the publications.

- Detailed Guidance document
- Concise Executive Summary document
- Case Study fact sheet

The publications are structured to provide a review of each technology and project application and

Gannett Fleming's experience in evaluating and planning environmentally sustainable projects in Maryland was key in the development of educational materials in support of AASHTO's TIG Program.

Client

Maryland Department of Transportation State Highway Administration

Location

Baltimore, Maryland

Firm's Fee

\$39,715

include the identification of benefits, requirements, and considerations associated with implementation of the technologies.

We also participated in the local conference and national webinar presentations in support of the AASHTO TIG effort.
